

Final Plots' Report

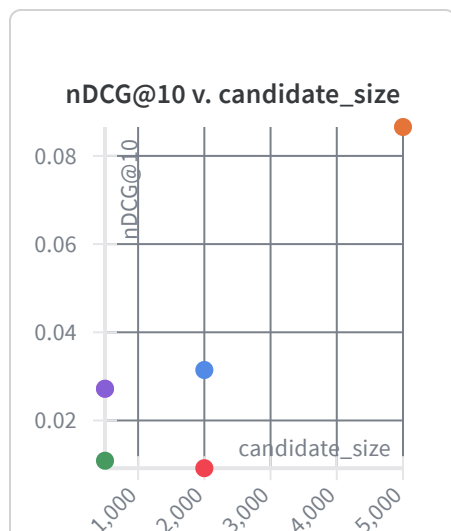

It is very obvious from the graphs that the orange bar, which refers to SBERT_Lambda_1.0_MaxLen_256_5k, is the absolute winner. The most important thing behind the success of the orange bar is the availability of a very large number of choices initially, which is 5,000 choices. Even by making minor adjustments such as text lengths, no improvement could be made, but making an initial larger set of choices to work with immediately increases the scores of everything. In conclusion, all we have to do to obtain
